

TUTORIAL

Google Integration

Teachers and students have two ways to support tighter workflows between Realize and Google Classroom and Google Drive.

Work done and tracked in Realize

Google Classroom Share Button Overview

Realize supports the integration of Google's "[Classroom Share Button](#)" directly into Realize. This feature enables teachers to easily add links in Google Classroom that point to select content types within Realize. In order to use the Classroom Share Button in Realize, teachers must have access to Google Classroom. Access to Google Classroom requires a district-provided [G Suite for Education](#) account.

Google Drive Integration Overview

Realize allows users to upload files directly from the user's local drive. For example, teachers can upload files to customize lesson content, teachers and students can upload files as attachments to discussion board posts, and students can upload files to their assignment submissions. Users can also link to files directly from their Google Drive. Users with personal Google accounts OR district-provided [G Suite for Education](#) accounts can use the Google Drive integration features in Realize.

Savvas Realize EasyBridge Plus users can access any of their Savvas K-12 products using only their Google login credentials. EasyBridge Plus supports SAML-based SSO integrations with Google acting as the identity provider.

Enabling Google Classroom

Teachers enable the Google Classroom integration in **Settings**.

The screenshot shows the Pearson Realize teacher dashboard. On the left, there are sections for 'Contact information' (Email address: julie.harvill@pearson.com) and 'Account information' (Username: julie.harvill@cert, Reset your password). On the right, there's a navigation menu with 'Settings' highlighted in a red box. Below the navigation menu, there are three circular buttons: 'Programs' (green), 'Classes' (red), and a blue button with the number '3'. Below these are two program cards for 'myPerspectives ELA Grade 6' and 'myPerspectives ELA Grade 7', each with a 'View all Programs' link. To the right of these cards are two red boxes: 'No new assignments submitted' (with 'View class' link) and 'No new attachments' (with 'View class' link). Further right is a blue box for 'Create assignments' with a 'Find items to assign' link. At the bottom left, there's an 'Integrations' section with a red border, containing a checked checkbox for 'Google Classroom™' and a description: 'Share supported content from your Realize programs with your classes in Google Classroom.' A 'Save' button is at the bottom right.

After enabling Google Drive in settings, teachers will find the **Attach from Google Drive** in the **Create Content** menu.

The screenshot shows the 'Table of Contents' page. On the left, there are three cards: 'Getting Started with myPerspectives' (with a link icon), 'Teacher's Edition' (with a book icon), and 'UNIT 1: Growing Up' (with a photo of children playing basketball). On the right, there's a 'Create Content' dropdown menu with 'Attach from Google Drive' highlighted in a red box. Other options in the menu include 'Upload a file', 'Add a link', 'Build a test', 'Rearrange', 'My Content', and 'Teacher Resources'.

Teachers can share Realize content that displays the **Share Google Classroom** link.

Locked and hidden content items cannot be shared with Google Classroom.

- If not already signed in, teachers sign in to **Google Classroom** and select a class.
- In **Google Classroom**, teachers create an assignment, question, or announcement.
- Students complete the assignment/work in **Google Classroom**. Note that data, such as time on task or mastery, is not captured on Realize if work is completed in **Google Classroom**.
